

# Powering a Sustainable Future

through Weatherization, Electrification & Solar

## Program Overview

Habitat operates three climate resiliency programs; weatherization, electrification and solar. These programs are aimed at helping income qualified homeowners in Montgomery County reduce energy costs and usage, improve indoor air quality and home comfort while ensuring a more sustainable future.

## Potential Services

- Air sealing
- Insulating attics, crawlspaces, and basements
- Replacing & electrifying water heaters
- Adding ventilation (exhaust fans)
- Replacing & repairing roofs
- Replacing & electrifying HVAC systems
- Upgrading gas appliances to electric
- Installing smoke & CO detectors
- Upgrading window AC units
- Installing free, rooftop solar panels
- Remediating mold and addressing other barriers to weatherization

**Weatherization**

**Solar**

**Electrification**

## Benefits

Energy Independence: Reduce reliance on fossil fuels.

Increased Home Value: Energy efficient upgrades can boost your property's market value.

Healthier Living Environment: Improved air quality, comfort and temperature regulation contribute to better health.

Long-Term Savings: Energy efficient appliances and solar panels can reduce energy bills.

# Weatherization/Electrification

Household Size	Maximum Income
1	\$74,800
2	\$85,450
3	\$96,150
4	\$106,800
5	\$115,350
6	\$123,900
7	\$132,450
8+	\$141,000

## To be eligible, one must:

- Be a current resident of Montgomery County
- Be a homeowner with a current homeowners insurance policy
- Reside in your home for at least one year as your primary residence
- Have a need for weatherization or have previously had your home weatherized
